NON-FINAL REJECTION

Specification

The specification is objected to because it does not contain headings, i.e., "Summary of the Invention". Correction is required.

Claim Rejections

Claim Rejections - 35 USC § 112

Claims 1-2 and 4-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Correction or clarification is required.

In claim 1, the recitation "feedback circuit . . . said second side" is confusing and misdescriptive because it is inconsistent with what is disclosed in the preferred embodiment or shown in the drawings. For example, Figure 1 of the present invention shows that the feedback circuit (15) is coupled between inputs of a plurality of subcircuits (12a-12d) and the noise source is one of the subcircuits. No such first side and second side of the subcircuit and such interconnections of the feedback circuit is seen in the drawings as claimed.

The remaining claims are dependent from the above claims and therefore also considered indefinite.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 are rejected under 35 USC 102 (a) as being anticipated by Liu et al (“A Negative . . . Method”, 1999IEEE, pages 49-53).

As the best construed, Liu et al discloses in Figures 2 and 4 a circuit comprising:

- a noise source (R, S, Figure 2, column 2 of page 49);
- a sub-circuits (R1, R2, C);
- a noise medium (VDD and VSS coupled to the substrate in Figure 2) capable of transferring noise signals from the noise source to the sub- circuit; and
- a feedback circuit (A).

Allowable Subject Matter

Claims 3-4 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action. These claims are allowed because the prior art of record fail to suggest the further feedback circuit as combined in claim 3.
